Attempt : 1

Total Mark : 10

Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3

1 2 3

4 5 6

7 8 9

Output: Sum of the main diagonal: 15

Sum of the secondary diagonal: 15

Answer

```
import java.util.Scanner;
class monica{
    public static void main(String[] args){
        Scanner scanner = new Scanner(System.in);
        int n=scanner.nextInt();
        int matrix[][]=new int[n][n];
        for(int i=0;i<n;i++){
            for(int j=0;j<n;j++){
                matrix[i][j]=scanner.nextInt();
            }
        }
        int maindiag=0;
        int seconddiag=0;
        for(int i=0;i<n;i++){
            maindiag += matrix[i][i];
            seconddiag += matrix[i][n-1-i];
        }
        System.out.println("Sum of the main diagonal :"+maindiag);
    }
}
```

```
System.out.println("Sum of the secondary diagonal : "+seconddiag);  
scanner.close();  
}  
}
```

Status : Correct

Marks : 10/10
